01 Brief Introduction

The China International Conference on Nanoscience and Technology (*ChinaNANO* 2025) serves as a platform for academic communication on cutting-edge developments in international nanotechnology, as well as a competitive platform for nanotechnology enterprises to look globally, showcase their competitive strength, and develop emerging markets. The organizing committee of the conference has specially set up a "Nanotechnology Exhibition" to create an opportunity for high-tech enterprises in the field of nanotechnology to have face-to-face exchanges with internationally renowned experts, researchers, hospital directors, etc., and jointly create a "government-business-industry-academia-research-application" close cooperation nano innovation chain and supply chain. The conference will set up exhibition areas for new energy, new materials, nanomedicine, in vitro diagnostics, nanodevices, nanomanufacturing, nanomeasurement, instruments and equipment, and academic publishing to facilitate the comprehensive promotion and display of materials, products, equipment, and services related to nanotechnology by participating enterprises.

ChinaNANO 2025 will be held from August 30th to September 1st, 2025 at the Beijing International Convention Center. Here, we sincerely invite all enterprises to actively participate in the exhibition, work together to build a nanotechnology exchange platform, and promote the innovative development of nanotechnology!
